- Yes No Unknown

*Possible uses that can cause contamination include: operation of electrical transformer stations, disposal of waste materials, raw material storage, and residues left in containers, maintenance activities and spills. Some commercial properties such as gasoline stations, automotive repair garages, and dry cleaning plants have similar potential. The longer a property is under industrial or similar use, the greater the contamination. Also, a series of different industrial or similar uses upon a site could potentially increase the number of chemicals which are present.

If previous use of property is industrial or commercial, or if YES to any of questions above, please attach a previous use inventory showing all former uses of the subject land, or if applicable, the land(s) adjacent to the subject lands.

ACKNOWLEDGEMENT CLAUSE

I acknowledge that as a condition of approval of this application that the Municipality may require me to file a Record of Site Condition signed by a qualified person in the provincial Environmental Site Registry, and provide verification to the Municipality of acknowledgement of this Record of Site Condition by the Ministry of Environment.
